# Multi-Printer 300-600 for Several Tracks

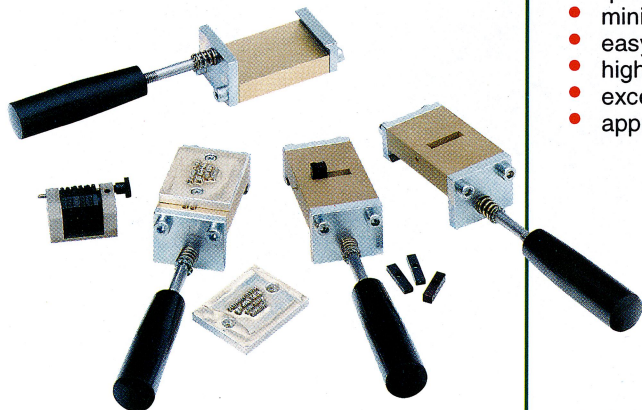

The Multi-Printer, a hot foil printing machine with elektro pneumatic multiple printhead for stretcher leveler and several tracks packaging machines.

The printhead, which is fitted in a stable mounting frame, can be adapted to mostly all packaging machines.

As the printing machine is equipped with a central printing cylinder, it can be adapted with several typeholders. A minimum of foil use results by an angle optimization.

With the Multi-Printer there can be used clichées, steel types and datingsystems. Any of these printing tools can be combined.

## Advantages

- quick change of typeholders
- minimum of foil use
- easy mounting
- high function level
- excellent printing quality
- approved digital control unit
